DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Prior art fails to teach or suggest the use of six elongated flanges and six arcuate connecting faces located between the flanges. While prior art discloses various embodiments of wire shelves and support stands, it does not succeed in disclosing support stands for shelves that allow for the shelves to expanded arbitrarily. Furthermore, while Prior art does disclose various embodiments where the shelves can expand, they are all at incremented angles of 90 and 180 degrees. Whereas the present device allows the racks to be positioned at various different angles, so as to fit the requirement of different sites, thereby increasing the overall versatility of the device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
